

Your Best Winter Wellness Solution: Cleaning, Sanitizing & Disinfecting

Did you know that
in a span of 24 hours the
average adult touches

**7,200
surfaces¹**
and touches their face
552 times?²

74%
of staff

want their place
of business to be
thoroughly and
regularly cleaned
and disinfected.¹

Enhance your business's healthy spaces with proper [sanitizing and disinfecting](#) to help provide healthier and safer spaces this winter.

Here's Why

Cleaning products only remove dirt and impurities from surfaces and objects.

Sanitizing lowers the number of germs on surfaces or objects to a safe level, as judged by public health standards or requirements. This process **works by either cleaning or disinfecting** surfaces or objects to lower the risk of spreading infection.

Disinfecting helps destroy viruses, fungi and germs on surfaces. Regulated by the EPA, disinfecting products kill these organisms and prevent them from spreading.

Best Practice:

Layer cleaning, sanitizing and disinfecting into your hygiene program to help provide peace of mind for workers and customers.

The CDC Recommends:

- Cleaning and disinfecting daily⁴
- A two-step cleaning and disinfecting process⁵
